Biaxin Oral Suspension 125 mg/5 mL
Este medicamento se usa para tratar infecciones.

Cómo tomar el medicamento
Tome el medicamento por la boca dos veces al día con las comidas - desayuno y cena.

| | | | |
|---------------|----------|---------------|--------------|
| Desayuno | Almuerzo | Comida | Al acostarse |
| 1 cucharadita | | 1 cucharadita | |

Use una (1) cucharadita llena cada vez.

Use el medicamento por 10 días en total.

Instrucciones
Tome el medicamento con alimentos.
Mantenga este medicamento a temperatura ambiente.
Agite la botella bien antes de tomar esta medicamento.
Evite beber jugo de toronja o pomelo mientras esté tomando este medicamento.
Una vez que haya tomado el medicamento por el número total de días indicados, deseche todo el medicamento restante.
Es importante que continúe tomando todas las dosis de este medicamento a la hora indicada aunque se sienta bien.
Si olvida tomar una dosis, tómela tan pronto como se acuerde. Si es casi hora de su siguiente dosis, en lugar de tomar la dosis olvidada vuelva a su programa regular. No tome 2 dosis de este medicamento a la vez.
Informe a su médico o farmacéutico si usted toma algún otro medicamento con o sin receta, vitaminas, medicamentos herbales o alguna otra cosa para su salud.

1

Demonstrations of medication techniques for viewing during counseling or at the patient's home.

Developed by Polyglot Systems, Meducation® is a web-based software service to help every healthcare provider and pharmacy address language barriers, health literacy and educational needs. Patients can receive customized, language-specific written instructions and review medication demonstrations from the comfort of their home.

What is Meducation?

- A database of instructions describing 90% of the most commonly prescribed medications. It can be customized for uncommon medications, too.
- Software-as-a-Service (“SaaS”) based delivery
- Provides easy-to-read and view patient centered prescription instructions & demonstrations
- Accurate translations in English & 11 other languages
- Prints in large font sizes for elderly and visually impaired patients
- Real-time reporting of data about your customer’s multilingual prescription needs
- Integrates easily with any electronic health record (“EHR”) or pharmacy management system (“PMS”)

Medication mistakes are the most common form of medical errors in the United States. Helping our elderly with easy to read, larger sized instructions and our non-English speaking patients with written instructions in their language is critical to patient safety.

Talk to us today about how we can help you better care for patients.
