

## Meducation® Wins Again!!

**Morrisville, NC - August 9, 2016** - For the second year in a row, Polyglot Systems, Inc.'s [Meducation](#)® software has been recognized as "Best Product" in the Pharmacy Operations Equipment and Services category at the National Association of Chain Drug Stores' Total Store Expo. Click [here](#) for NACDS' official announcement.

"It feels great to win this award two years in a row" said Lori McLean, Polyglot CEO. "Our team works hard to continually enhance Meducation. It is wonderful to see their efforts pay off with such a resounding, industry-wide acknowledgement of Meducation's value."

Meducation was represented at the Total Store Expo by [First Databank](#), which has partnered with Polyglot to distribute and resell Meducation.

Standard medication instructions are too confusing. They are routinely written at advanced reading levels, printed in small font sizes and available only in English. Since nearly one out of every three Americans is "low health literate," this results in poor medication adherence, poor health outcomes and poor patient satisfaction.

Meducation provides a solution by delivering medication instructions that:

- Are uniquely tailored to each patient,
- Are written at a 5th-to 8th grade reading level,
- Are available in any of 21 different languages,
- Use pictures to convey information clearly, and
- Are augmented by video demonstrations.

###

**About Polyglot Systems**

[Polyglot Systems'](#) award-winning Meducation software was developed under a grant from the National Institutes of Health to address the communication barriers between healthcare providers and their patients. By improving patient understanding, medication adherence and overall patient health are improved, reducing healthcare costs and increasing patient satisfaction. Polyglot's products have been licensed to hospitals, health systems, clinics and pharmacies.
